

Mushrooms of Mayne Island, 2019

<b>Scientific Name:</b>	<b>Common name:</b>	<b>Toxic/Non-toxic/Edible:</b>	<b>Notable features:</b>
Aleuria aurantia	Orange Peel Fungus	edible	in sandy soil along paths and roadways
Agaricus deardorffensis or buckmacadooii	Felt-ringed agaricus	poisonous	one of the "Lose your lunch bunch" of mushrooms
Amanita pantherina	Panther Cap	poisonous	under Douglas fir
Amanita silvicola	Western Woodland Amanita	poisonous	under Douglas fir
Aureoboletus mirabilis	Admirable bolete	edible	near rotting Hemlock trees
Boletus edulis	King bolete	edible	single or scattered under conifers
Cantharellus formosus	Pacific Golden Chanterelle	edible	under Douglas fir, Hemlock, Spruce
Cantharellus subalbidus	White Chanterelle	edible	insides look like cooked chicken breast
Chalciporus piperatus = Boletus piperatus	Peppery Bolete	unknown	in coniferous forests
Chlorophyllum olivieri = Lepiota rachodes	Shaggy Parasol (new name)	edible when thoroughly cooked	in forests and along roadways
Clavariadelphus truncatus	Flat-topped Club	edible, but laxative if eaten in quantity	in forests
Clitocybe deceptiva		suspected to be poisonous	smells like cheap hotel soap
Clitocybe dilatata	Crowded White Clitocybe	poisonous	along roadways and under low vegetation
Crepidotus mollis	Jelly Creep		grows on the bark of dead trees
Cystoderma fallax	Common Conifer Cystoderma	not edible	on rotting wood
Cystodermella granulorum			
Fomitopsis mounceae	Red-belted polypore		perennial
Galerina marginata	FUNERAL BELL!	DEADLY!	on stumps and wood near conifers
Gomphidius oregonensis	Slime Cap	edible, but no flavour	under Douglas fir
Gomphidius subroseus	Rosy Gomphidius	edible but bland	under Douglas fir
Gymnopilus sapineus			
Hebeloma crustuliniforme	Poison Pie	poisonous	Mycorrhizal, grows in autumn in woods and in grass,
Hebeloma mesophaeum	Veiled Heboloma	poisonous	Fairy Ring and arc formations
Helvella vespertina	Fluted Black Elfin Saddle	not recommended, possibly toxic	under Spruce
Hohenbuehelia petaloides	Shoehorn Oyster Mushroom	edible, but no flavour	in groups on grassy verges and in forests
Hydnum repandum	Hedgehog Mushroom	edible	on rotting wood and sawdust
Hydnum umbilicatum	Belly-button Hedgehog	edible	in forests on the ground
Hygrocybe conica	Witch's Hat = Conical Waxy Cap	not edible	under Douglas fir and Western Hemlock
Hygrocybe singeri	no common name	unknown	turns black after being picked
Hygrophorus agathosmus	Gray Almond Waxy Cap	edible but no flavour	on the ground
Hypholoma capnoides	Smoky-gilled Woodlover	edible	smells like almonds, grows with spruce
			on decaying Douglas Fir

Mushrooms of Mayne Island, 2019

Hypholoma fasciculare	Clustered Woodlover	poisonous	sickly green colour, grows on decaying wood
Hypomyces cervinogenus			parasitic mold, grows on Black Elfin Saddle
Hypomyces lactiflorum	Lobster Mushroom	edible ONLY when young	bright orange, in coniferous forests
Inocybe geophylla	White Fibrehead	poisonous	under Aspens and conifers
Inocybe lilacina	Lilac Inocybe	poisonous	in coniferous forests
Inocybe sororia	Corn Silk Inocybe	poisonous	under Douglas fir
Inocybe whitei = Inocybe pudica	Blushing Inocybe	poisonous	under Aspens and in damp forests
Jahnoporus hirtus	Bitter Iodine Polypore	not edible	smells like iodine, grows on ground under trees
Laccaria amethysteo-occidentalis	Western Amethyst Laccaria	edible	under Douglas fir
Laccaria bicolor	Two-colored Laccaria	edible, but not tasty	on mosses under conifers
Laccaria laccata		edible but discard stem	grows in boggy areas under trees
Lactarius luculentus	Orange Milkcap	not edible	under Alder and Spruce
Lactarius rubrilacteus	Bleeding Milkcap	edible but has a grainy texture	under Douglas fir
Lepiota clypeolaria	Shaggy-stalked Parasol	poisonous	on leaf litter in forests
Lepista nuda	Blewit	edible ONLY when cooked	in rings on organic debris and decaying matter
Leucoagaricus leucothites	Man on Motorcycle = Smooth Parasol	edible, but sometimes not ...	on grassy areas, roadways, compost piles
Leucopaxillus albissimus	Large White Leucopaxillus	not edible	in rings in conifer forests
Lycoperdon perlatum	Gemmed Puffball	edible only when firm and white inside	grows in forests and on disturbed ground
Melanoleuca melaleuca		edible	
Mycena galericulata	Toque Mycena		at the base of old stumps
Mycena pura	Lilac Mycena	poisonous	in coniferous humus and leaf litter, smells like radish
Otidea onotica	Donkey Ears	not edible	in groups under Douglas fir
Pseudohydnum gelatinosum	Toothed jelly = Great Spirit Gummy Bear		on decayed wood
Psilocybe pelliculosa	Conifer Psilocybe	hallucinogenic	along paths and clearings in conifer forests
Rhodocollybia butyracea	Buttery collybia		in coniferous humus and leaf litter
Russula brevipes	Short-stemmed russula	edible but insipid and granular	host to parasitic Lobster Mushroom (edible)
Russula foetida	Foetid Russula	not edible	smells like a new shower curtain
Russula nigricans	Blackening Russula	avoid, may cause rhabdomyolysis	in coniferous and deciduous forests
Russula xerampelina	Shrimp Russula	edible	in coniferous and mixed woods
Suillus lakei	Western Painted Suillus	edible	scattered under Douglas fir
Suillus caerulescens	Slippery Jack	edible but not palatable	
Tricholoma magnivelare= Tricholoma murrillianu	Pine Mushroom = Matsutake	edible	scattered under Douglas fir and mixed conifers
Tricholoma myomyces	Yellowing Knight	unknown	under conifers
Tricholoma pardinum	Tiger Tricholoma	poisonous	in mixed woods
Tricholoma saponaceum	Soapy tricholoma		

Mushrooms of Mayne Island, 2019

Turbinellis floccosus=Gomphus floccosus  
Xeromphalina campanella

Scaly vase chanterelle  
Orange fuzzy foot

poisonous

grows on moss under conifers  
in groups on rotting conifers
